

Aqua Steel

Water-Based Stainless-Steel Polish

Aqua Steel's emulsion formula allows it to be used on aluminum, zinc, iron, brass, copper, silver, and other metals. Aqua Steel prevents re-soiling and finger marking while restoring the original luster. Some buffing may be necessary on metals with grain.

Directions for Use

Spray a moderate amount of Aqua Steel on a damp cloth. Apply to surface, following the grain of the metal. Buff out with a clean cloth, again following the grain of the metal.

Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's may be downloaded from www.gatorchemical.com.

Technical Specifications

Color	Clear
Scent	Lemon
Foaming	High
Solubility in Water	Complete
Density (lb/gal)	N/A
Flash Point	142 °F
pH	N/A

Packaging

12 x 18 Ounces
