IMPORTANT NOTES

Both clean and soiled tables are to be bolted to the dishmachine with the 1/4-20x1/2" bolts and nuts provided.

Leaks cause potential problems in electrical and mechanical areas under the machine.

Quick drains (table scuppers) are not compatible with stage type conveyor dishmachines.

Scrap sinks shall be no closer than 20" minimum from the dishmachine end of table.

The clean exit table should be at least 72" straight for efficient conveyor operation.

Electrical and plumbing connects must be made by a qualified service person who will comply with all appropriate state and local health, electrical, plumbing, and safety codes.

*Manufacturer reserves the right to modify these specifications in compliance with regulatory agencies and manufacturing expediency.
